

Administrator at the address shown below. Frivolous or insubstantial requests for a hearing may be denied by the Regional Administrator. However, if a substantial request for a public hearing is made by July 28, 1995, a public hearing will be held. If no timely and appropriate request for a hearing is received and the Regional Administrator does not elect to hold a hearing on his own motion, this determination shall become effective July 28, 1995.

Any request for a public hearing shall include the following: (1) The name, address, and telephone number of the individual, organization or other entity requesting a hearing. (2) A brief statement of the requesting person's interest in the Regional Administrator's determination and of information that the requesting person intended to submit at such hearing. (3) The signature of the individual making the request; or, if the request is made on behalf of an organization or other entity, the signature of a responsible official of the organization or other entity.

ADDRESSES: All documents relating to this determination are available for inspection between the hours of 8:00 a.m. and 5:00 p.m. Monday through Friday, at the following offices:

Maine Department of Human Services,
Drinking Water Program, 157 Capitol
Street, Augusta, ME 04333

and

U.S. Environmental Protection
Agency—New England, Water
Management Division, Ground Water
Management and Water Supply
Branch, One Congress Street—11th
Floor, Boston, MA 02203

BILLING CODE 6560-50-P

[FRL-5227-9]

**Underground Injection Control
Program; Hazardous Waste Injection
Restrictions; Petition for Exemption—
Class I Hazardous Waste Injection;
Disposal Systems, Inc.**

AGENCY: Environmental Protection
Agency.

ACTION: Notice of Final Decision on
Petition Reissuance.

SUMMARY: Notice is hereby given that reissuance of an exemption to the land disposal restrictions under the 1984 Hazardous and Solid Waste Amendments to the Resource Conservation and Recovery Act has been granted to Disposal Systems, Inc., for the Class I injection wells located at Deer Park, Texas. As required by 40 CFR part 148, the company has adequately demonstrated to the satisfaction of the Environmental Protection Agency by petition and supporting documentation that, to a reasonable degree of certainty, there will be no migration of hazardous constituents from the injection zone for as long as the waste remains hazardous. This final decision allows the underground injection by Disposal Systems, Inc., of the specific restricted hazardous waste identified in the exemption reissuance, into the Class I hazardous waste injection wells at the Deer Park, Texas facility specifically identified in the reissued exemption, for as long as the basis for granting an approval of this exemption remains valid, under provisions of 40 CFR 148.24. As required by 40 CFR 124.10, a public notice was issued April 26, 1995. The public comment period ended on June 12, 1995. All comments have been addressed and have been considered in the final decision. This decision constitutes final Agency action and there is no Administrative appeal.

DATES: This action is effective as of June 21, 1995.

ADDRESSES: Copies of the reissued petition and all pertinent information relating thereto are on file at the following location: Environmental Protection Agency, Region 6, Water Management Division, Water Supply Branch (6W-SU), 1445 Ross Avenue, Dallas, Texas 75202-2733.

Conference on Air Quality Modeling

AGENCY: U.S. Environmental Protection
Agency (EPA).

ACTION: Notice of Conference.

SUMMARY: EPA announces the Sixth Conference on Air Quality Modeling. Such a conference is required by Section 320 of the Clean Air Act (CAA) to be held every 3 years. The purpose of the Sixth Conference is to provide a forum for public review of modeling techniques that may be candidates for use in regulatory applications.

DATES: The sixth conference will be held on August 9-10, 1995 from 9:00 a.m. to 5:00 p.m. As needed to allow for presentation of all verbal comments, the conference may extend to noon of the next day. Requests to speak at the conference should be submitted to the individuals listed below by July 26, 1995. All written comments must be submitted by COB October 10, 1995.

ADDRESSES: Conference: The conference will be held in the GSA Auditorium, GSA National Capitol Region Building, 7th and D Streets, SW., Washington, DC.

Comments: Written statements or comments not presented at the conference should be submitted (in duplicate if possible) to: OAR Regulatory Docket (6102), Room M-1500, Waterside Mall, Attention: OAR Regulatory Docket AQM-95-01, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460.

Copies of technical review materials may be obtained from several sources. Copies of all materials may be obtained from the docket. Many materials will also be available from the National Technical Information Service (NTIS), U.S. Dept. of Commerce, Springfield, VA 22161; (703) 487-4650. In addition, many materials may be obtained from the Support Center for Regulatory Air Models Bulletin Board System by downloading the appropriate file. To register or access this electronic bulletin board, users with a personal computer should dial (919) 541-5742.

Docket: Items referenced in this notice as well as comments received are maintained in Docket AQM-95-01. The docket is available for public inspection and copying between 8:00 a.m. and 5:30 p.m., Monday through Friday, at the address above. A reasonable fee may be charged for copying.

FOR FURTHER INFORMATION CONTACT:
Joseph A. Tikvart, Chief, Air Quality Modeling Group (MD-14), Office of Air Quality Planning and Standards, U.S. Environmental Protection Agency, Research Triangle Park, NC 27711;

telephone (919) 541-5562 or C. Thomas Coulter, telephone (919) 541-0832.

SUPPLEMENTARY INFORMATION

Background

The Guideline on Air Quality Models (Revised)(hereafter, "Guideline"¹) is used by EPA, States, and private industry in the review and preparation of new source permits and SIP revisions. The Guideline serves as a means by which consistency is maintained in air quality analyses. It was first incorporated in the Code of Federal Regulations in 1978 and was subsequently revised in 1986 to include knowledge concerning modeling analyses that developed since the original guidance was issued. In 1988 four techniques were added as supplement A to the Guideline as a result of public comments on the 1986 revisions. In 1993, the Guideline was further revised with supplement B, and supplement C is expected to be promulgated soon.

To support the process of developing and revising the Guideline during the period 1977-1988, the First, Second and Third Conferences on Air Quality Modeling were held as required by Section 320 of the Clean Air Act to help standardize modeling procedures. These modeling conferences provided EPA with comments on the Guideline and associated revisions, thereby facilitating introduction of improved modeling techniques into the regulatory process.

In October 1988, the Fourth Conference on Air Quality Modeling was held. Its purpose was to advise the public on new modeling techniques and to solicit comments to guide EPA's consideration of any rulemaking needed to further revise the Guideline. The new models provide techniques for situations where specific procedures had not previously been available, and also improve several previously adopted techniques.

The Fifth Conference on Air Quality Modeling, held in March 1991, served as the public hearing for the proposed supplement B revisions to the Guideline (aforementioned). Since the Fifth Conference and the imminent adoption of supplement C, EPA believes it is time to consider a wide range of modeling issues in order to update its available modeling tools with state-of-the-science techniques. The Agency believes the Sixth Conference will appropriately serve as an ideal forum for the airing of these issues and the public offering of new ideas. The public feedback from such a conference is invaluable.

Public Participation

The Sixth Conference on Air Quality Modeling will be open to the public; no admission fee is charged. The conference will begin the first morning with introductory remarks by EPA officials. The conference will continue with prepared presentations on several key modeling areas, i.e., long range transport modeling under the Interagency Workgroup on Air Quality Modeling (IWAQM²) and the development of an enhanced Gaussian dispersion model with boundary layer parameterization (AERMOD³). In the afternoon, invited speakers will discuss special topics, i.e., the Electric Power Research Institute's building downwash program, as well as several new and developing models (CAMRAQ, MODELS3, HPDM).

The second morning, discussion of special topics will continue based on voluntary presentations. Such presentations may include topics such as air models for accidental releases, fires, etc., air models for risk assessment of toxic pollutants, model evaluation, candidate models for Guideline appendix B, and miscellaneous models/data processing systems. These presentations will be followed by a critical review/discussion of the IWAQM and AERMOD modeling systems facilitated jointly by the Air & Waste Management Association's AB-3 Committee and the American Meteorological Society's Committee of Meteorological Aspects of Air Pollution. That afternoon representatives of State and local air pollution control agencies, appropriate Federal agencies, and professional and constituency groups will be invited to make statements. The conference will then be opened to statements and comments from the general public.

For the new models and modeling techniques described, EPA will be asking the public to address the following questions:

- What is the scientific merit of the models presented?
- What is their accuracy?
- What should be the regulatory use of individual models for specific applications?
- What implementation issues are apparent and what additional guidance is needed?

² IWAQM was formed in 1991 to provide a focus for development of technically sound regional air quality models for regulatory assessments of pollutant source impacts on federal Class I areas. IWAQM is an interagency collaboration that includes efforts by EPA, U.S. Forest Service, National Park Service, and Fish and Wildlife Service.

³ AMS/EPA Regulatory Model; AERMOD is being developed by AERMIC: AMS/EPA Regulatory Model Improvement Committee.

- What are the resource requirements of modeling systems presented?
- What additional analyses or information are needed?

Persons wishing to speak at the conference, whether to volunteer a presentation on a special topic or to offer general comment on any of the modeling techniques scheduled for presentation, should contact EPA at the address given in the **FURTHER INFORMATION** section no later than July 26. Such persons should identify the organization (if any) on whose behalf they are speaking and the length of presentation. An early contact regarding voluntary presentations of special topics, as well as time required and any materials that can be made publicly available, would help facilitate organization of the conference. If a presentation of general comments is projected to be longer than 10 minutes, the presenter should also state why a longer period is needed. Persons failing to submit a written notice but desiring to speak at the conference should notify the presiding officer immediately before the conference and will be scheduled on a time-available basis.

The conference will be conducted informally and chaired by an EPA official. There will be no sworn testimony or cross examination. A verbatim transcript of the conference proceedings will be produced and placed in the docket. Speakers should bring extra copies of their presentation for inclusion in the docket, for the convenience of the reporter. Speakers will be permitted to enter into the record any additional written comments that are not presented orally. Additional written statements or comments should be sent to the OAR Regulatory Docket (see **ADDRESSES** section). A transcript of the proceedings and a copy of all written comments will be maintained in Docket AQM-95-01 which will remain open until October 10, 1995 for the purpose of receiving additional comments.

Dated: June 21, 1995.

Mary D. Nichols,

Assistant Administrator for Air and Radiation.
